

# Using CabPay Charging & Pairing

## CHARGING YOUR DEVICE

Your CabPay payment device comes with a USB charging cable.

## PAIRING YOUR DEVICE

**1**

Enable Bluetooth in your mobile device settings.

Your mobile device will search and find the CabPay payment device identified as **Miura**.

Hold the tick button on the payment device until the Bluetooth symbol flashes.

**2**

Once PAIRED, your mobile device will show CONNECTED and should connect automatically when the device is switched on and within range.

A matching unique number code will appear on on both your mobile device and the CabPay payment device. Press PAIR on your mobile device and press the TICK button on the payment device.

**PAIR**

**PRESS**

Your Device is now PAIRED. The Bluetooth symbol on the device will now remain solid. PAIRING can be lost for a number of non-serious reasons for instance walking out of Bluetooth range. You may have to pair again. See *Troubleshooting*.
